

## KAISHAN In Accordance with Federal Uniform Test Method for Certain Lubricated Air Compressors

Rotary Compressor: Fixed Speed

| MODEL DATA - FOR COMPRESSED AIR |  |              |                         |  |
|---------------------------------|--|--------------|-------------------------|--|
| 1                               | Manufacturer: Kaishan Compressor USA   |              |                         |  |
|                                 | Model Number: KRSB-10-125  | Date:        | 2/7/2021                |  |
| 2                               | X Air-cooled Water-cooled  | Type:        | Screw                   |  |
|                                 |  | # of Stages: | 1                       |  |
| 3*                              | Rated Capacity at Full Load Operating Pressure a, e  | 37.1         | acfm <sup>a,e</sup>     |  |
| 4*                              | Full Load Operating Pressure <sup>b</sup>  | 125          | psig <sup>b</sup>       |  |
| 5                               | Maximum Full Flow Operating Pressure c   | 135          | psig <sup>c</sup>       |  |
| 6                               | Drive Motor Nominal Rating   | 10           | hp                      |  |
| 7                               | Drive Motor Nominal Efficiency   | 90.6         | percent                 |  |
| 8                               | Fan Motor Nominal Rating (if applicable)   | 0.5          | hp                      |  |
| 9                               | Fan Motor Nominal Efficiency   | 76.2         | percent                 |  |
| 10*                             | Total Package Input Power at Zero Flow <sup>e</sup>  | 3.5          | kW <sup>e</sup>         |  |
| 11                              | Total Package Input Power at Rated Capacity and Full Load<br>Operating Pressure <sup>d</sup> | 9.60         | kW <sup>d</sup>         |  |
| 12*                             | Package Specific Power at Rated Capacity and Full Load Operating Pressure                    | 25.88        | kW/100 cfm <sup>e</sup> |  |
| 13                              | Isentropic Efficiency  | 58.05        | Percent                 |  |

\*For models that are tested in the CAGI Performance Verification Program, these items are verified by the third party administrator.

Consult CAGI website for a list of participants in the third party verification program: www.cagi.o.

NOTES:

- a. Measured at the discharge terminal point of the compressor package in accordance with ISO 1217, Annex C; ACFM is actual cubic feet per minute at inlet conditions.
- b. The operating pressure at which the Capacity (Item 3) and Electrical Consumption (Item 11) were measured for this data sheet
- c. Maximum pressure attainable at full flow, usually the unload pressure setting for load/no load control or the maximum pressure attainable before capacity control begins. May require additional power.
- d. Total package input power at other than reported operating points will vary with control strategy.
- e. Tolerance is specified in ISO 1217, Annex C, as shown in table below:

  NOTE: The terms "power" and "energy" are synonymous for purposes of this document.
